

Immersive viewing starts with a curve

Inspired by nature, the subtle curve of this display puts you front and center for the most immersive experience imaginable. UltraWide QHD resolution delivers vivid imagery with full 99% sRGB and over 1 billion colors for astounding color accuracy and smoother gradation. The expansive 21:9 screen is designed for multitasking with Multiview technology to simultaneously display content from two different sources. Integrated HDMI (included the new HDMI 2.0), DisplayPort 1.2, MHL and USB 3.0 connectors make it easy to hook up all your devices and the elegant built-in speakers feature DTS Sound™ for rich, realistic audio.

PHILIPS

Enhanced audio with DTS Sound™

Integrated speakers with DTS Sound™ deliver realistic stereo sound straight from your display. This sound enrichment suite uses a variety of post-processing techniques to expand the sound image, add natural surround effects, enhance the bass and improve the overall definition of your audio. Five pre-set user modes allow you to further refine your sound experience to bring your music, movies and games to life.

Why do I need it?

- Curved display design for a more immersive viewing experience
- Ultra-narrow bezel for maximum viewing area with minimum distraction
- More room for multitasking: UltraWide Quad HD combines the productivity of two 20-inch monitors in a single screen
- Vivid, true-to-life color with 99% sRGB and over 1 billion colors
- Built-in speakers with DTS Sound™ for richer, more realistic audio
- Multiview to display content from two different sources at the same time
- AH-IPS LCD screen for extra-wide viewing angles and high contrast imagery
